We had a busy week learning all about weather. We used our cutting and counting skills to create a cool rain cloud windsock. We worked hard each day on a weather journal—we wrote daily weather words and had drawings reflecting the weather. We did an experiment that helped us understand how rain clouds work. Everyone loved the fun “5 little raindrops” and the “Interactive Wind” song.
We worked hard on our weather journals, learned about different kinds of clouds, painted the wind and had fun with our rain station.
