On Monday we had a wonderful Valentine’s Day party! Thank you to all the parents who sent in something. Our friends loved the yummy breakfast and had a blast passing out valentines. We also started our Earth and Sky unit. This week we focused on the difference between day and night. We measured pictures of ourselves using suns, moons, and stars. We also made name suns where we practiced writing the letters in our name, cutting, and gluing. Next week we will focus on weather!
